Art Unit: 1755

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 10 and 13, drawn to a magnesium silicate/magnesium titanate composition, classified in class 501, subclass 136.
- II. Claims 4-6, 11 and 14, drawn to a magnesium titanate/calcium titanate composition, classified in class 501, subclass 136.
- III. Claims 7-9, 12 and 15, drawn to a magnesium titanate/magnesium silicate/calcium titanate compositions, classified in class 501, subclass 136.

The inventions are distinct, each from the other because of the following reasons:

The inventions I-III are independent of one another, each requiring particulars not required by the others.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
